ABOUT PRODUCT

ABOUT E-SMS

This Product is designed keeping in mind different essential requirements which benefits students, parents, teachers, principals and managing trustees by professionalizing schooling system using technology to enhance communication, coping with current needs and for the future.

E-SMS SYSTEM OVERVIEW

This Product consist of electronic identification cards which after being issued to students, teachers, other staff members will be scanned at scanners installed on the school entrance every working school day at the time of arrival. When the schools starts the operator appointed by our company will print the report and send SMS to parents of the students who are absent and more.

Each student will get a independent student information management system which will have independent file for each student with the information of that individual student which will be stored and upgraded in two separate categories primary information data base and secondary information data base.

The primary information will consist -the students full name, date of birth, address, recent photograph, gender, parents information with contact numbers.

The secondary information will store day to day activity of students data in to database, which is stored into center server.

When ever a students happens to leave the school premises before the official working hours, he/she is required to swipe ID Card.

Escalate consultancy on behalf of the school will notify parents about variety of information via SMS.

STUDENTS

STUDENTS BENEFITS

The following are some of the direct benefits that will be received by every student of the participating school.

Every student will get a electronic identification card with student's personal information, photograph and other standard information printed on it. This cards will be used by all students while entering school to mark their daily time of arrival at the school, if the students fails to arrive at the school after the set time a SMS will be sent to the parents mobile informing them about their child/children is not present at the school. This feature enhances safety for students, parents and the participating school.
